"The Last Mile Between Wearable Tech and Healthcare"

Tuesday, September 24, 2019
1:30 P.M. - 2:30 P.M.

HSC - Clinical Sciences Building, CSC 203
2250 Alcazar Street, 2nd Floor, Los Angeles, CA

Wearable devices are perfect for healthcare providers to collect health information outside of a hospital. This trend is happening, but not as fast we thought. What’s going on? As we are pushing medical frontier from hospital to home, what’s the obstacles to slow us down? AI (Artificial Intelligence) no doubt plays a key role in this answer, but it must be more than layers of neuron networks. We need empathetic thoughts when designing Medical AI that can really make behavior change. In this talk, we will share the thinking process and the real case study for heart failure management.
